

Searching and Navigation

The **South Australian Integrated Land Information System (SAILIS)** offers an extensive land information product suite online at www.SAILIS.sa.gov.au

SAILIS offers intuitive searching and navigations features, enabling users to quickly access the property information they are seeking.

Searching

Wildcards (*) can be useful when searching in SAILIS to replace or represent one or more characters when you are unsure of spelling or wish to return a wider range of results. For example, in an Address Search if the suburb search is entered as Glenelg* the results returned will include Glenelg North and Glenelg East.

Commas (,) can be used for returning more results. For example multiple Deposited Plans can be ordered when the Plan numbers are separated by commas.

A Dash (-) can be used to search for a number range. For example, in an Address Search a range can be entered in the Street Number Field (100-105).

Fields that are not mandatory can be left blank to return wider search results.

Navigation

Hyperlinks (shown in blue underlined text) are found throughout SAILIS and can be used to access additional information on a record. For example, in a Register Search hyperlinks may be available to link directly to the Parent Title(s), Description of Land and Dealings attached to a property.

Should you have further enquiries, please contact Land Services SA.
