## Aluminium Composite Panel (ACP) Cladding

---

The State Government is pursuing its aim to raise public awareness about the risks of Aluminium Composite Panel (ACP) Cladding.

At the end of the PIR/Form 1 there is a "Notices" section that identifies organisations having interests in related land. Please be advised that the following statement has been added to the "Notices" section:

*Aluminium Composite Panel Cladding (ACP) is defined as flat or profiled aluminium sheet material in composite with any type of material. ACP is an external building cladding material which can create a fire risk if used or installed incorrectly.*

*Both Vendors and Purchasers should take reasonable steps to determine if ACP has been identified on any buildings on the land, and also the status of any required remediation works related to the presence of ACP on such building.*

If you have any questions regarding the notice in the PIR/Form 1 please email: [DIT.LandBoundaries.sa.gov.au](mailto:DIT.LandBoundaries.sa.gov.au), or further information about ACP can be found on the Plan SA website: [https://plan.sa.gov.au/our\\_planning\\_system/programs\\_and\\_initiatives/aluminium\\_composite\\_panel\\_audit](https://plan.sa.gov.au/our_planning_system/programs_and_initiatives/aluminium_composite_panel_audit)
