New Closure and Joins Report – Digital Plan Lodgement

Over the last 12 months, Land Services SA has advised of the impending introduction of the new Closure and Joins Report in the Digital Plan Lodgement (DPL) system.

I am pleased to announce that today, Thursday 13 November 2025, the new Closure and Joins Report is available for Survey Industry users within DPL. This new, interactive Report replaces the redundant PCPlans system and enables industry to validate the closure and joins of a plan prior to lodgement, reducing requisitions and saving you time and money.

In February 2026, a further DPL release will introduce new requirements for Industry to correct or provide explanation as to identified data errors on a plan prior to lodgement. This will be included as part of the Plan Certification tab in DPL.

The staged approach to the introduction of the new data validation requirements gives industry over 2 months in which to gain comfort with the way the Closure and Joins Report works and potentially review internal plan drafting processes to ensure smooth lodgement from February 2026.

Land Services SA are offering a range of support to Industry, and you are encouraged to take advantage of these:

Closure and Joins Report Demonstration
