

General Search Products

The **South Australian Integrated Land Information System (SAILIS)** offers an extensive land information product suite online at www.sailis.lssa.com.au. Below are products that can be accessed through the General Search Menu Option.

Survey Mark Search

The Survey Mark Search uses the Survey Mark reference to provide Survey Mark details including horizontal and vertical coordinates and Survey Plan Details including associated Plans.

The Survey Mark is a 9-digit number which is the unique identifier for a Permanent Survey Mark. In this search, multiple Survey Marks can be searched separated by commas (for example 662549897,662543116).

Survey Marks can also be searched spatially through the South Australian Property and Planning Atlas (SAPPA) which is a free map-based application for viewing land administration boundaries. For online access to SAPPA go to <https://sappa.plan.sa.gov.au/>

Agent Code Search

The Agent Code Search provides the Agent Name and Agent Code reference.

Miscellaneous Search

The Miscellaneous Search is for ordering products that are not available online. Copies will be scanned and delivered to your nominated email address. This process may take up to 72 hours.

Unregistered dealings can be ordered through the Miscellaneous Search by selecting the **Order unregistered dealing for viewing** item type from the drop-down list. Orders for an unregistered dealing must be placed by 3pm to view the following business day.

Dealing Image Search

The Dealing Image Search can be used to order a copy of a registered dealing. You will need the dealing Number, which is a unique number assigned to each dealing lodged with Land Services SA. The dealing number can be obtained from any of the Register Search, Check Search or Historical Search functions in SAILIS.

Where an image does not exist for a dealing a copy can be ordered through the Miscellaneous Search option in the SAILIS General Search menu.
